

## Food Resources in Niagara - Asset Map

*Helpful hints for best user experience*

The Niagara Food Asset Map was created as an outcome of the Niagara Food Security Network (NFSN). NFSN is made up of over 100 individuals and community organizations and was created with the goal to strengthen food security for all residents in Niagara.

### Starting Your Search

To begin searching for resources, select a location from the drop down menu.

Once you have selected your location, click one of the categories to see the resources available. These will display as a list with links to more information, as well as pins on the map showing you the location of these resources.

### More Information About a Resource

To get more information about a resource, including location/contact information, either click the “Show More” message found underneath the name of the organization in the list of resources or click on the pin found on the map.

### Viewing All Categories

All resources on the map are divided into categories. These categories can be seen in the box on the left side of the map. Depending on your device/window settings, you may need to scroll down to view all categories.

### Resetting Search/Selection

In order to remove pins from a previous search you will need to “Clear” the map. This is done by clicking the “Reset” icon at the top of the Categories box.
